

2<sup>nd</sup> degree Reiki, welcome

Hi and welcome to your level 2, 2<sup>nd</sup> degree traditional Usui Reiki course. You've decided to continue your progressive journey of Reiki with Calm Oasis Holistic Therapy. What follows is an introduction to your training provider and training instructor. There follows professional standards for holistic therapists and other subjects that are pertinent to professional practice to receive paying clients. You may think this irrelevant to learn but it is vitally important to becoming a professional in the field of energy healing. There is no course work at present however there is a need to have 3 clients for case study and a final exam. Your clients for case study will each receive 6 Reiki therapy sessions, one session each week for 6 weeks and each session lasts one hour.

You will conduct consultation with your clients and explain to them how you will maintain their confidentiality, and privacy and dignity. You will then write a case study, for each of those clients, which are like a report for each client but omit, leave out their personal information. You will then submit these for assessment at which time you can request your exam.

You can receive your energetic attunements any time and return to them as an on-going reiju practice and blessing... You have life time access to the materials and can return time and again to recap your learning. You can also take as long as you wish to complete your case study however I suggest a period of 6 months.

Note that as you progress on there are no captions however each recording, script, is available to download to read along; this I hope is helpful to students who speak languages other than English... So let's make progress...
